

Custom Styled Maps with Mobile Roadie

Custom maps are a powerful add-on feature that allows you to create branded map experiences that enhance user-experience and better visualize your location data. A user's true location can be shown over a custom illustrated map along with sets of custom illustrated pins marking key locations, providing useful and accurate data within a highly branded interactive experience.

Custom Map Basics

- Users within map confines will see a "Near Me" button to see just the pins around them.
- User location determined by GPS and updates in real time with movement.
- Ability to categorize location types which are toggable from a "drawer" navigation.
- Our design team can create custom pin styles for any of your locations, or select from our dozens of preselected colored pins.
- Add as many location pins as necessary to mark your key locations.
- Category icons are customizable and can match pin colors.
- Map overlaid on top of Google Maps (Android) or Apple Maps (iOS). You can provide a map illustration or we can design it for you.
